

EDS

DISTRIBUTOR HV MODULE WITH COMMON FLOATING GROUND

SYSTEMS

- ▶ 16 / 24 / 32 / 48 channel, 500 V / 3 kV versions
- ▶ Low Cost versions with reduced current measurement accuracy
- ▶ very low ripple and noise
- ▶ hardware voltage and current limit
- ▶ voltage control and current measurement per channel
- ▶ programmable parameters (delayed trip etc.)

The cost effective EDS distribution modules are multichannel high voltage power supplies in MMS-system (Eurocard format). It is available as Standard version and as Low Cost version with reduced resolution and precision of current measurement. The EDS comes with common floating ground to reduce voltage noise level. With up to 48 channels each single channel has an independent voltage control. The module is made of high precision components such as 24 bit ADC and 20 bit DAC and provides comprehensive security features.
